REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The instant application discloses a bistable memory device and digital processor for event detection. A search of prior art records has fail to disclose a bistable memory device and digital processor for event detection comprising; "a second bistable memory device, said bistable memory device having an input adapted for detecting the occurrence of an event and an output representing a logic state of said bistable memory device, wherein said logic state is at either a first or a second logic level such that the logic level of said logic state changes each time the event is detected; and a digital processor, said digital processor having an input coupled to the output of said first bistable memory device and another input coupled to the output of said second bistable memory device, whereby said digital processor periodically reads said logic states and stores the logic levels thereof wherein said digital processor compares the logic level of a subsequently read logic state with the stored logic level so as to determine whether the stored logic level is the same or different than the logic level of said subsequently read logic state, if different then an event has occurred and if the same then no event has occurred; wherein said event detector is coupled between said transmitter said computer, and said receiver and said computer such that said first bistable memory device is coupled to said receiver and said second bistable memory device is coupled to a serial output of said computer" as disclosed in claim 27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
